DISCONTINUATION OF THE IMAQ PCI-1408

National Instruments is discontinuing the IMAQ PCI-1408 device, cable, and software for Windows and Mac OS. You must place your order for these products by May 15, 2002, and accept delivery for that order by May 29, 2002.

Important Dates

Final Order: May 15, 2002
Final Delivery: May 29, 2002

PCI-1408 quantities are limited. You must submit lifetime buy orders by May 15, 2002. After this date, these products will no longer be available. Please account for attrition of your current product when calculating your lifetime buy quantities.

As stated in the warranty, National Instruments will continue to offer its standard one-year warranty for products purchased by May 15, 2002.

Alternative Solution

National Instruments offers the PCI-1409 (778200-01) as a higher quality alternative to the PCI-1408. Because NI-IMAQ ensures interchangeable camera support, it is not necessary to alter existing code in order to use the PCI-1409.

The PCI-1409 uses a 68-pin VHDCI connector, while the PCI-1408 uses the 25-pin DSUB connector. The IMAQ A6825 adaptor (187797-0R3) is available for interfacing custom PCI-1408 cables with the PCI-1409.

For information on PCI-1409 functionality, visit `ni.com/vision`.
