1 MS/s AI, 512 MB DRAM, Kintex-7 160T FPGA

This document describes how to begin using the PCIe-7857.

Safety Guidelines

Caution Observe all instructions and cautions in the user documentation. Using the model in a manner not specified can damage the model and compromise the built-in safety protection. Return damaged models to NI for repair.

EMC Guidelines

This product was tested and complies with the regulatory requirements and limits for electromagnetic compatibility (EMC) stated in the product specifications. These requirements and limits provide reasonable protection against harmful interference when the product is operated in the intended operational electromagnetic environment.

This product is intended for use in industrial locations. However, harmful interference may occur in some installations, when the product is connected to a peripheral device or test object, or if the product is used in residential or commercial areas. To minimize interference with radio and television reception and prevent unacceptable performance degradation, install and use this product in strict accordance with the instructions in the product documentation.

Furthermore, any changes or modifications to the product not expressly approved by NI could void your authority to operate it under your local regulatory rules.

Notice Operate this product only with shielded cables and accessories.

Notice The length of all I/O cables must be no longer than 3 m (10 ft).

Preparing the Environment

Ensure that the environment in which you are using the NI PCIe-7857 meets the following specifications.

Note Refer to the device specifications on ni.com/manuals for complete specifications.

Storage Environment

Temperature

Operating ¹	0 °C to 55 °C
Storage	-20 °C to 70 °C

Humidity

Operating	10% RH to 90% RH, noncondensing
Storage	5% RH to 95% RH, noncondensing

Pollution Degree	2
------------------	---

Maximum altitude	2,000 m (at 25 °C ambient temperature)
------------------	--

¹ For PCI Express adapter cards without integrated air movers, NI defines the local operational ambient environment to be 25 mm (1 in.) upstream of the leading edge of the card with system airflow of at least 0.4 m/s (80 LFM) for half length cards and 0.6 m/s (120 LFM) for three-quarter length cards. For more information about the local operational ambient environment definition for PCI Express adapter cards, visit ni.com/info and enter the Info Code `pcielocalambient`.

Unpacking the Kit

Notice To prevent electrostatic discharge (ESD) from damaging the device, ground yourself using a grounding strap or by holding a grounded object, such as your computer chassis.

1. Touch the antistatic package to a metal part of the computer chassis.
2. Remove the device from the package and inspect the device for loose components or any other sign of damage.

Notice Never touch the exposed pins of connectors.

Note Do not install a device if it appears damaged in any way.

3. Unpack any other items and documentation from the kit.

Store the device in the antistatic package when the device is not in use.

Installing Software on the Host Computer

Before using the PCIe-7857, you must install the following application software and device drivers on the host computer.

1. LabVIEW 2018 SP1 or later
2. LabVIEW FPGA Module 2018 or later
3. NI R Series Multifunction RIO Device Drivers January 2019 or later

Visit ni.com/info and enter the Info Code `softwareversion` for minimum software support information.

Installing the PCIe-7857

1. Power off and unplug the computer.
2. Access the computer system expansion slots. This step might require you to remove one or more access panels on the computer case.
3. Locate a compatible slot and remove the corresponding slot cover on the computer back panel.
4. Touch any metal part of the computer to discharge any static electricity.
5. Insert the PCIe-7857 into the applicable PCI Express system slot. Gently rock the PCIe-7857 into place. Do not force the device into place.

You cannot install PCI Express devices in PCI slots. PCI Express devices support up-plugging into a PCI Express slot of higher lane width. For more information, refer to ni.com/pciexpress.
