RELEASE NOTES
Calibration Executive

Version 4.0

This document contains important information about Calibration Executive Version 4.0. Refer to the Readme for your specific Calibration Executive product for the latest information about new features, known issues, and installation instructions.

Known Issues

The VST calibration procedure for PXIe-5644, PXIe-5645, and PXIe-5646 modules intermittently fails to update the external calibration date after a successful calibration. For more information, visit `ni.com/info` and enter the Info Code `vstcaldate` to access the NI KnowledgeBase article, *VST Calibration Date Not Updated After Successful Calibration*.

Upgrade and Compatibility Issues

Calibration Executive 4.0 does not support direct upgrades from previous versions of Calibration Executive. Before you install Calibration Executive 4.0, you must uninstall any previous versions of Calibration Executive.

The installation architecture for Calibration Executive database files (`Calibration Reports.mdb` and `CustomerandStandardsStorage.mdb`) has changed in version 4.0. If you are upgrading from a previous version of Calibration Executive, you can save a copy of your calibration reports database, and then configure Calibration Executive 4.0 to retrieve it.

To upgrade to Calibration Executive 4.0:

1. Create a report database backup copy.

   Refer to the *Calibration Reports Database* topic in the *Calibration Executive Help* for steps to save a calibration reports database backup.
2. Uninstall any previous version of Calibration Executive.
3. Install Calibration Executive 4.0.
4. Replace the `Calibration Reports.mdb` file in the default location with the backup copy created in step 1, or configure database options to specify the path to the backup copy.

   Refer to *Configuring Database Options* in the *Calibration Executive Help* for steps to specify the path to the calibration reports database.

NATIONAL INSTRUMENTS™

Worldwide Support and Services

The NI website is your complete resource for technical support. At `ni.com/support` you have access to everything from troubleshooting and application development self-help resources to email and phone assistance from NI Application Engineers.

Visit `ni.com/services` for NI Factory Installation Services, repairs, extended warranty, and other services.

Visit `ni.com/register` to register your NI product. Product registration facilitates technical support and ensures that you receive important information updates from NI.

A Declaration of Conformity (DoC) is our claim of compliance with the Council of the European Communities using the manufacturer's declaration of conformity. This system affords the user protection for electromagnetic compatibility (EMC) and product safety. You can obtain the DoC for your product by visiting `ni.com/certification`. If your product supports calibration, you can obtain the calibration certificate for your product at `ni.com/calibration`.

NI corporate headquarters is located at 11500 North Mopac Expressway, Austin, Texas, 78759-3504. NI also has offices located around the world. For telephone support in the United States, create your service request at `ni.com/support` or dial 1 866 ASK MYNI (275 6964). For telephone support outside the United States, visit the Worldwide Offices section of `ni.com/niglobal` to access the branch office websites, which provide up-to-date contact information, support phone numbers, email addresses, and current events.
