NOTE TO USERS

Ferrite Installation

NI USB X Series BNC and Mass Termination Devices

To ensure the specified EMC performance for radiated RF emissions of the NI USB X Series BNC and Mass Termination devices, install the included snap-on ferrite bead onto the power cable, as shown in the following figure.

Ensure that the ferrite bead is as close to the end of the power cable as practical. Install the snap-on ferrite bead by opening the housing and looping the power cable once through the center of the ferrite. Close the ferrite bead until the locking tabs engage securely.

You can order additional EMI suppression ferrites, 10.2 mm length (part number 781233-02) from NI.
