## INSTALLATION GUIDE

# NI-DAQ™ mx Upgrade for USB-9211 and USB-9215 Devices

This guide describes how to upgrade your National Instruments USB-9211 and USB-9215 devices to USB-9211A and USB-9215A devices using the USB-9162 carrier included in your kit.

## Installation

---

1. Make sure the USB-9162 carrier is not connected to the computer.
2. Unplug the USB cable, and make sure no signals are connected to the USB-9211/9215 device.
3. Squeeze the latches on the NI 9211/9215 module and disconnect it from the USB-9161 carrier.
4. Squeeze the latches on the NI 9211/9215 module and insert it into the USB-9162 carrier. Release the latches, and press firmly on the module until the latches lock it into place.
5. Install NI-DAQmx and the newly installed hardware by following the instructions provided in the *NI-DAQmx for USB Devices Getting Started Guide*.

**Note** For information about converting an existing application from NI-DAQmx Base to NI-DAQmx, go to [ni.com/info](http://ni.com/info) and enter `base2mx`.
