

COMPREHENSIVE SERVICES

We offer competitive repair and calibration services, as well as easily accessible documentation and free downloadable resources.

SELL YOUR SURPLUS

We buy new, used, decommissioned, and surplus parts from every NI series. We work out the best solution to suit your individual needs.

 Sell For Cash  Get Credit  Receive a Trade-In Deal

OBSOLETE NI HARDWARE IN STOCK & READY TO SHIP

We stock **New**, **New Surplus**, **Refurbished**, and **Reconditioned** NI Hardware.

Bridging the gap between the manufacturer and your legacy test system.

VXI-MIO-64XE-10

SCXI™-1356 SHIELDED CABLE INSTALLATION GUIDE

This guide describes how to install the SCXI-1356 shielded cable between a 100-pin VXI-MIO Series module and two SCXI modules.

Introduction

With the SCXI-1356 shielded cable, you can make a low-noise, long-distance connection between a VXI-MIO Series module and two SCXI modules. The cable is available in 1, 2, 5, and 10 m lengths. The cable is Y-shaped, with a 100-pin male connector at one end and two 68-pin female connectors on the branched end. One 68-pin connector branch is labeled **MIO-16**, and the other is labeled **ACH16-ACH63**. Refer to Figure 1 for the parts locator diagram.

The 100-pin connector attaches to a VXI-MIO-64E-1 or VXI-MIO-64XE-10 module. The MIO-16 branch of the cable attaches to an SCXI-1349 adapter. The ACH16-ACH63 branch of the cable attaches to an AI-48/DIO-24 adapter.

The SCXI-1349 and AI-48/DIO-24 attach to a variety of SCXI modules. Both of these adapters have breakout connectors for connecting to other SCXI accessories, such as the SCXI-1180 and the SCXI-1351.

What You Need to Get Started

To install the SCXI-1356 shielded cable, you need the following items:

- SCXI-1356 shielded cable (type SH96-6868)
- SCXI-1356 Shielded Cable Installation Guide*
- SCXI-1349 adapter—several surface-mount parts and the number 182677 are visible on the underside of the board (included in this kit)
- AI-48/DIO-24 adapter, labeled **AI-48/DIO-24** on the underside of the board (included in this kit)

National Instruments™, NI™, ni.com™, and SCXI™ are trademarks of National Instruments Corporation. Product and company names mentioned herein are trademarks or trade names of their respective companies. For patents covering National Instruments products, refer to the appropriate location: **Help»Patents** in your software, the `patents.txt` file on your CD, or `ni.com/patents`.

April 2002
371212A-01

- Two SCXI modules
- SCXI chassis
- VXIbus chassis
- One of the following modules:
 - VXI-MIO-64E-1
 - VXI-MIO-64XE-10
- Four small screws (included in this kit)
- Lockwashers
- Jackscrews
- Small Phillips screwdriver
- Small flathead screwdriver
- 3/16 in. nutdriver

Conventions

The following conventions are used in this document:

bold

Bold text denotes parameter names and hardware labels.

This icon denotes a note, which alerts you to important information.

italic

Italic text denotes variables, emphasis, a cross reference, or an introduction to a key concept. This font also denotes text that is a placeholder for a word or value that you must supply.

monospace

Text in this font denotes text or characters that you should enter from the keyboard, sections of code, programming examples, and syntax examples. This font is also used for the proper names of disk drives, paths, directories, programs, subprograms, subroutines, device names, functions, operations, variables, filenames and extensions, and code excerpts.

Safety Information

The following section contains important safety information that you *must* follow when installing and using the product.

Do *not* operate the product in a manner not specified in this document. Misuse of the product can result in a hazard. You can compromise the

safety protection built into the product if the product is damaged in any way. If the product is damaged, return it to National Instruments for repair.

Do *not* substitute parts or modify the product except as described in this document. Use the product only with the chassis, modules, accessories, and cables specified in the installation instructions. You *must* have all covers and filler panels installed during operation of the product.

Do *not* operate the product in an explosive atmosphere or where there may be flammable gases or fumes. Operate the product only at or below the pollution degree stated in the *Specifications* section. Pollution is foreign matter in a solid, liquid, or gaseous state that can reduce dielectric strength or surface resistivity. The following is a description of pollution degrees:

- Pollution degree 1 means no pollution or only dry, nonconductive pollution occurs. The pollution has no influence.
- Pollution degree 2 means that only nonconductive pollution occurs in most cases. Occasionally, however, a temporary conductivity caused by condensation must be expected.
- Pollution degree 3 means that conductive pollution occurs, or dry, nonconductive pollution occurs that becomes conductive due to condensation.

Clean the product with a soft nonmetallic brush. Make sure that the product is completely dry and free from contaminants before returning it to service.

You *must* insulate signal connections for the maximum voltage for which the product is rated. Do *not* exceed the maximum ratings for the product. Remove power from signal lines before connecting them to or disconnecting them from the product.

Operate this product only at or below the installation category stated in the *Specifications* section.

The following is a description of installation categories:

- Installation category I is for measurements performed on circuits not directly connected to MAINS¹. This category is a signal level such as voltages on a printed wire board (PWB) on the secondary of an isolation transformer.

Examples of installation category I are measurements on circuits not derived from MAINS and specially protected (internal) MAINS-derived circuits.

¹ MAINS is defined as the electricity supply system to which the equipment concerned is designed to be connected either for powering the equipment or for measurement purposes.

- Installation category II is for measurements performed on circuits directly connected to the low-voltage installation. This category refers to local-level distribution such as that provided by a standard wall outlet.

Examples of installation category II are measurements on household appliances, portable tools, and similar equipment.

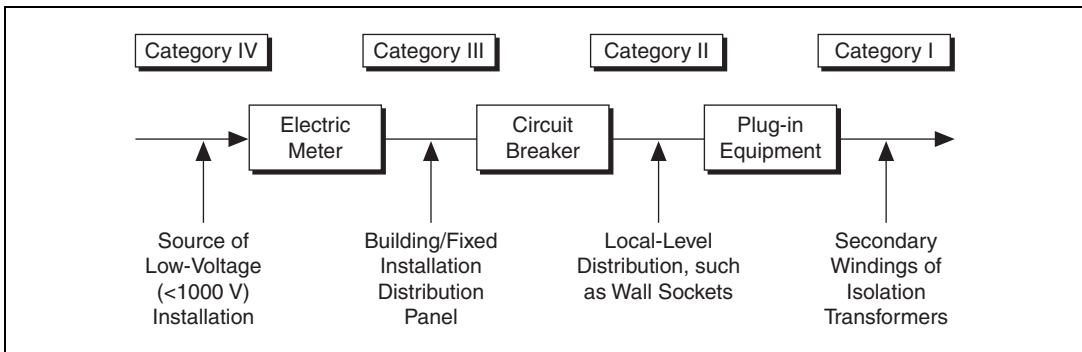

- Installation category III is for measurements performed in the building installation. This category is a distribution level referring to hardwired equipment that does not rely on standard building insulation.

Examples of installation category III include measurements on distribution circuits and circuit breakers. Other examples of installation category III are wiring including cables, bus-bars, junction boxes, switches, socket outlets in the building/fixed installation, and equipment for industrial use, such as stationary motors with a permanent connection to the building/fixed installation.

- Installation category IV is for measurements performed at the source of the low-voltage (<1,000 V) installation.

Examples of category IV are electric meters, and measurements on primary overcurrent protection devices and ripple-control units.

Below is a diagram of a sample installation.

Installing the SCXI-1356 Shielded Cable

Perform the following steps to install the SCXI-1356. Refer to Figure 1 and Figure 2 as you complete the installation.

1. Power off the VXIbus chassis and the SCXI chassis.
2. Install the SCXI modules in the SCXI chassis, following the instructions in the module user manuals.
3. Plug the socket connector of the SCXI-1349 into the rear signal connector of the SCXI module that will pass analog signals to the VXI-MIO Series module.
4. Secure the SCXI-1349 to the SCXI chassis by threading two of the screws through the rear panel of the SCXI-1349 and into the threaded strips in the rear of the SCXI chassis.
5. Connect the MIO-16 branch of the cable to the 68-pin connector of the SCXI-1349.
6. Plug the socket connector of the AI-48/DIO-24 into the rear signal connector of the SCXI module or the feedthrough panel to which you plan to connect the ACH16–ACH63 signals of the VXI-MIO Series module.
7. Secure the adapter by threading the other two screws through the rear panel of the AI-48/DIO-24 and into the threaded strips in the rear of the SCXI chassis.
8. Connect the ACH16–ACH63 branch of the cable to the 68-pin connector of the AI-48/DIO-24.
9. Install the jackscrews and lockwashers as shown in Figure 2.
10. Verify that the two backshell mounting ears are positioned as shown in Figure 2. If they are not, remove the mounting ears and install them in the correct position.
11. Connect the backshell assembly to the VXI module front connector and secure the backshell by tightening both M2.5 mounting screws.

Figure 1. SCXI-1356 Installation Procedure

Figure 2 shows a closer view of the ACH16–ACH63 branch of the cable connecting to the VXI-MIO module.

Figure 2. VXI Module Connection

Connections and Pin Assignments

Which VXI-MIO Series module you use determines which SCXI modules you can use with the SCXI-1356.

Connecting the SCXI-1356 to a VXI-MIO Series Module

The MIO-16 branch of the cable brings the MIO-16 portion of the VXI-MIO Series pinout to the SCXI-1349. The ACH16-ACH63 branch of the cable brings the remainder of the VXI-MIO Series pinout to the AI-48/DIO-24.

MIO-16 Branch Connections

You can connect the MIO-16 branch of the cable, using the SCXI-1349, to the following SCXI modules:

- SCXI-1100
- SCXI-1102
- SCXI-1120 or SCXI-1121 or SCXI-1122
- SCXI-1124
- SCXI-1140 or SCXI-1141
- SCXI-1160 or SCXI-1161 or SCXI-1162 or SCXI-1162R or SCXI-1163 or SCXI-1163HV
- SCXI-1180 or SCXI-1181

Table 1 lists the pin assignments for connections between the VXI-MIO Series module and the MIO-16 branch of the cable.

Note Avoid using the MIO-16 Branch digital lines by themselves when using the SCXI-1356.

You can access the PFI lines on the MIO-16 Branch of the cable for triggering through the SCXI-1349 side connector using the SCXI-1180 Feedthrough Panel. For more information on the SCXI-1180, refer to the *SCXI-1180/1181 User Manual*.

ACH16-ACH63 Branch Connections

You can connect the ACH16–ACH63 branch of the cable, using the AI-48/DIO-24, to the SCXI-1180 feedthrough panel or the SCXI-1181 breadboard module. Table 2 lists the pin designations for connections between the VXI-MIO Series module and the ACH16–ACH63 cable.

Specifications

Maximum Working Voltage

Maximum working voltage refers to the signal voltage plus the common-mode voltage.

Channel-to-earth250 V, installation category II

Channel-to-channel.....250 V, installation category II

Environmental

Operating temperature.....	0 to 50 °C
Storage temperature	-20 to 70 °C
Humidity	10 to 90% RH, noncondensing
Maximum altitude	2000 meters
Pollution degree (indoor use only).....	2

Safety

The SCXI-1356 meets the requirements of the following standards for safety and electrical equipment for measurement, control, and laboratory use:

- EN 61010-1:1993/A2:1995, IEC 61010-1:1990/A2:1995
- UL 3111-1:1994
- CAN/CSA c22.2 no. 1010.1:1992/A2:1997

Technical Support Resources

National Instruments Web Support

NI Web support is your first stop for help in solving installation, configuration, and application problems and questions. Online problem-solving and diagnostic resources include frequently asked questions, knowledge bases, product-specific troubleshooting wizards, manuals, drivers, software updates, and more. Web support is available through the Technical Support section of ni.com.

Worldwide Support

NI has offices located around the world to help address your support needs. You can access our branch office Web sites from the Worldwide Offices section of ni.com. Branch office Web sites provide up-to-date contact information, support phone numbers, e-mail addresses, and current events.

If you have searched the technical support resources on our Web site and still cannot find the answers you need, contact your local office or NI corporate. For telephone support in the United States, dial 512 795 8248. For telephone support outside the United States, contact your local branch office:
