

## NOTE TO USERS

# NI cDAQ-9172 Legacy CompactDAQ Chassis

## End of Life Notice

With the release of the new four-slot NI cDAQ-9174 and eight-slot NI cDAQ-9178 chassis, National Instruments is phasing out production of the original NI cDAQ-9172 eight-slot chassis. We recommend the new chassis as replacements because they provide the same form and functionality while delivering new features that offer more flexibility and ease of use. The new NI cDAQ-9174 four-slot chassis is also available at a lower price.

National Instruments is committed to the success of your applications and is making the legacy NI cDAQ-9172 chassis available for sale through **January 1, 2011**, with a final delivery of all items by March 31, 2011. Due to parts availability, we cannot

guarantee fulfillment of all orders. We will allocate available units on a first-come, first-served basis.

**Note** For the vast majority of applications, the new NI cDAQ-9174/78 chassis serve as drop-in replacements for the legacy NI cDAQ-9172 chassis. For more information on the differences between the legacy and replacement chassis, view the *cDAQ-9174/78 Upgrade Guide* by visiting [ni.com/info](http://ni.com/info) and entering `exn9fi`.

NI apologizes for any inconvenience. If you have questions, please contact your local NI field sales representative or call us toll free at 1-800-433-3488.
