## Quick Start Guide

# Compact FieldPoint™ Mounting Accessories for Stand-Alone Controllers

## What You Need to Get Set Up

- cFP-21xx controller
- Panel, DIN rail, or desktop mounting accessory kit
- Number 2 Phillips screwdriver

## Mounting the Controller on the Base

---

You can mount the cFP-21xx on a panel, on 35mm DIN rail, or on a desk or table. Each mounting kit described in this document is shipped with a base which you must fasten to the controller.

The following figure shows the proper orientation of the base in relation to the controller.

**Caution** Make sure that power is disconnected from the controller before you mount it on the base.

1. Align the captive screws on the controller with the holes in the base.
2. Using a number 2 Phillips screwdriver with a shank of at least 64 mm (2.5 in.) length, tighten the captive screws to 1.1 N · m (10 lb · in.) of torque.

# Mounting the Controller on a Panel

---

1. Fasten the panel-mount plate to the back of the base using a number 2 Phillips screwdriver and the 8-32  $\times$  5/16 in. countersunk screws shipped with the kit.

**Caution** If you substitute other screws for the screws shipped with the kit, do not use screws longer than 5/16 in. to fasten the panel-mount plate to the base.

2. Bolt or screw the panel-mount plate to a panel.

# Mounting the Controller on a DIN Rail

---

1. Fasten the DIN rail clip to the back of the base using a number 2 Phillips screwdriver and the 8-32  $\times$  5/16 in. countersunk screws shipped with the kit.

**Caution** If you substitute other screws for the screws shipped with the kit, do not use screws longer than 5/16 in. to fasten the DIN rail clip to the base.

2. Insert one edge of the DIN rail into the deeper opening of the DIN rail clip.
3. Press down firmly on the controller to compress the spring until the clip locks in place on the DIN rail.

# Mounting the Controller on a Desk or Table

---

1. Fasten the desktop mounting bracket to the back of the base using a number 2 Phillips screwdriver and the  $8\text{-}32 \times 5/16$  in. panhead screws shipped with the kit.

**Caution** If you substitute other screws for the screws shipped with the kit, do not use screws longer than  $5/16$  in. to fasten the bracket to the base.

- Using a number 2 Phillips screwdriver, tighten the captive screws on the two legs into the holes in the bracket.

## Where to Go from Here

---

Refer to the *cFP-21xx Quick Start Guide* and the *Measurement and Automation Explorer Help for FieldPoint* for information about connecting the cFP-21xx to your network, wiring power, installing software, and configuring the cFP-21xx.

# Where to Go for Support

---

The National Instruments Web site is your complete resource for technical support. At [ni.com/support](http://ni.com/support) you have access to everything from troubleshooting and application development self-help resources to email and phone assistance from NI Application Engineers.

National Instruments corporate headquarters is located at 11500 North Mopac Expressway, Austin, Texas, 78759-3504. National Instruments also has offices located around the world to help address your support needs. For telephone support in the United States, create your service request at [ni.com/support](http://ni.com/support) and follow the calling instructions or dial 512 795 8248. For telephone support outside the United States, contact your local branch office:
